ECLIPSES IN THE YEAR 1864.

There will be two Eclipses in this year, both of the Sun.

I. An Eclipse of the Sun on Thursday, May 5th, invisible in New Brunswick. This Eclipse will be visible in the greater part of North America west of 80° W. Longitude, the North Pacific Ocean, part of Asia, and part of Australia.

II. An Annular Eclipse of the Sun, on Sunday Oct. 30th, invisible in New Brunswick. This Eclipse will be visible at the Cape of Good Hope, in the whole of South America, and in part of North America south of 35° N. Latitude.

LIGHT HOUSES.

Board of Commissioners for the several Light Houses in the Bay of Fundy.
—Hon. S. L. Tilley, Charles Watters, James Steadman, G. L. Hatheway,
and John McMillan. R. W. Crookshank, Esq., Secretary; George W.
Smith, Accountant.

Cape Sable Seal Island Light.—The first Light in approaching the Bay of Fundy, is on the South Point of the Seal Island. This is a plain white Light, elevated about 80 feet above high water mark, and may be seen in approaching the Island from any point of the compass. A very dangerous rock, under water, but upon which the sea always breaks, called *Blonde Rock*, lies about $3\frac{1}{2}$ miles S. by W. by compass, from the Light House. Between this rock and the Island, there are some dangers—the ground is rocky throughout, and large vessels, therefore, ought not to attempt passing between them.

Brier Island Light.—In advancing up the Bay, the next Light is situated on Brier Island, about half a mile N. E. from the N. W. point thereof. A plain white light.

Digby Gut Light.—The next light on the coast of Nova Scotia is placed on the west side of Digby Gut—from Brier Island North Eastward. The coast is very bold and not indented; the Light is therefore chiefly intended as a guide into Digby Basin. A white Light.

Gannet Rock Light.—This Light is intended to warn vessels of their approach to a very dangerous range of shoals and ledges, which extend from the Old Proprietor to the Seal Islands off Machias, a distance of about twenty miles. It is a flash light—white—twenty seconds dark and forty light in each minute. The Light House is painted in stripes, vertical, black and white.

Bearings and Distances by Compass from the Gannet Rock Light House.

The Light bears from the Light house on Brier Island, N.N. $\frac{1}{2}$ W. 22 miles.

From the Gannet Rock to the Old Proprietor E. $\frac{1}{2}$ S. distance 7 miles.

From the Gannet Rock to the Black Rock, off White Head Island, N. E. $\frac{1}{2}$ E. 7 miles.

From the Gannet Rock to the South West Head of Grand Manan, N. N. W. $6\frac{1}{2}$ miles.

From the Gannet Rock to the Northernmost of the Murr Ledges, N.W. $\frac{1}{2}$ N. $2\frac{1}{2}$ miles.

To the Southermost of ditto, called St. Mary's Ledge, W. S. W. 2 miles.

From the Gannet Rock to Machias Seal Island, W. and by N. $\frac{1}{2}$ N. 13 miles.

NOTE.—Between the Northernmost and Southermost of the Murr Ledges, there is a range of dangerous rocks and shoals, many of them always above water, and which extends Westward from the Light House about four miles; from this range, farther Westerly, about six miles from the Gannet Light, lies a dangerous breaker called the Bull. This may be avoided by keeping three remarkable headlands near the S. W. end of Grand Manan, open.

From Brier Island Light to the Old Proprietor, N. and by W. $\frac{1}{2}$ W. $18\frac{1}{2}$ miles.

The Blonde Rock from the Southermost point of the Cape Sable Seal Island S. and by W. $3\frac{1}{4}$ miles distant.

Machias Seal Island Lights.—There are two fixed *white* lights upon the Machias Seal Islands, elevated about forty-five feet above high water, and bear from each other E. S. E. and W. N. W. distant about 200 feet, by which circumstance of two Light Houses at the same station, they will be immediately distinguished from all other lights upon the coast, (British or American) Both the Buildings are painted white. The following are the bearings from them, viz:—

To the Southernmost Murr Ledge, (St. Mary's) E. S. E. easterly.

" Gannet Rock Light, E. by S. $\frac{1}{4}$ S. 13 miles.

" Southern Head of Grand Manan, E. by N. $\frac{1}{4}$ N.

" Northern Head of Grand Manan, N. E. $\frac{1}{4}$ E.

" N. E. Rock, distant 2 miles, N. E. by N.

" Little River Head, N. by W.

" Libby Island Light House, (American), N. W. by W.

Vessels standing to the Northward, between these Lights and the Gannet Rock, should tack or haul off the moment they bring these Lights in one, as they will not then be more than three fourths of a mile from the Murr Ledges, if more than five miles to the East of the lights.

[It is recommended that the Ship's Compasses should be well compared and adjusted (particularly in new ships,) before they leave Partridge Island, as serious errors have frequently occurred from want of attention on this point; and as the variation in the Bay of Fundy is seventeen degrees Westerly, or ($1\frac{1}{2}$ points) it will be found by the latest published Admiralty Charts, that the course from Partridge Island down the Bay (South Channel) between the Old Proprietor, and N. W. Ledge, is S. W. $\frac{1}{2}$ S., but the course to be steered must depend on the direction of the wind on leaving Partridge Island.]

Head Harbour Light.—Next in order after passing Grand Manan and the plain white Light, (American) on West Quoddy Point, is Head Harbour Light. This is placed on the North East extremity of Campo Bello, and is a guide to vessels entering the main Channel to West Isles, Moose Island, and the inner Bay of Passamaquoddy; it enables vessels also at all times to enter Head Harbour—it is a fixed *white* light. The building is painted White, with a red cross on it.

Point Le Preau Lights.—Upon this projecting head land two lights are placed, one above the other, in the same house, and distant 28 feet—Both lights can be seen from every point of the compass, where they may be useful—both are fixed and *white*. The Light House is painted red and white, in stripes of five feet broad each, horizontally.

Partridge Island Light.—This light at the entrance of the River and Harbour of Saint John, having been established upwards of forty years, requires no particular notice, further than that it is a fixed *white* light, and that the Light House is red and white, in vertical stripes.

Beacon Light.—Within Partridge Island, and upon a Spit or Bar which extends about half a mile S. S. E. off Sand Point, and which dries at two thirds ebb, stands the Beacon Tower. Upon this Tower a light is established, which is eminently useful to the coasting trade of Saint John, and to all other vessels having pilots on board, as it enables them to enter the harbour at all hours of the night. A fixed *white* light. The house is white and black, in stripes vertically.

Quaco.—A revolving *white* light is placed on a small rock off Quaco Head, showing twice full and twice dark in a minute. This light can be seen from any quarter where a vessel can approach. The Light House is painted white and red in horizontal stripes.

Cape Enrage Light.—On the point of that name, in Westmorland, nearly opposite Apple River Harbour, N. S. A plain *white* light. The House is painted white, and is about 120 feet above tide mark.

West Quoddy Light.—This is an American Light, and is placed on the West side of the entrance into the Saint Croix by Lubec and Eastport.

Cape Forchu Light.—On Cape Forchu, on the western side of the entrance to Yarmouth (Nova Scotia,) in lat. 43, 39, N. long. 66, S. W. It exhibits a plain revolving light—visible one minute and a quarter, and invisible half a minute. The building is painted white and is elevated 135 feet above the level of the sea.

Grindstone Island Light.—An Octagonal Tower, sixty feet above the level of high water on Grindstone Island in Chignecto Bay, in lat. 45° 43' 19" N. long. 64° 37' 25" W. The Tower is painted white, as is also the Keeper's house, one story, situate about 50 feet to the Eastward of the Tower.

Bearings and distances of several places from the above Light House, as follows:

Cape Enrage Light by compass, S. 61½ W. 10 1-7 miles.

Highest point of St. Mary's Ledge by compass, N. 40 W., 6-10 miles.

The point of low water off the Light House, by compass, S. 78 W., 2-10 mile.

Jones' Ledge, N. 10 W., 3-10 mile, it dries at low springs and has about 2½ fathoms on it at half tide.

The Sand Bank, S. 15 W., 3-10 mile, it has 1½ fathoms on its shoalest part at lower water Springs.

Grand Manan.—There is a Light House and Keeper's House at the "Swallow Tail" on the North Eastern part of the Island of Grand Manan, in the Bay of Fundy. The Light is 45 feet from Base to Deck; the point on which it stands is 103 feet above high water, making 148 feet elevation. This is a conspicuous mark in the South Channel between Brier Island and Grand Manan. Both Houses are painted white.

Latitude, Longitude, and Variation of the Compass, at the following Light Stations in the Bay of Fundy, belonging to New Brunswick:

1st Month.

JANUARY, 1864.

31 Days.

PRESIDENT WILLIAMS says "the chief end and object of educating the farmer is to teach him to subordinate himself, and all animal and vegetable life around him, to those inexorable laws, moral and physical, the violation of which meets with swift retribution." Again, "a farmer should be a chemist, so far as a comprehension of the principles which affect his daily life and practice is concerned. He need not be an analytic chemist, but he should be familiar with those laws, the observance of which is indispensable to safety and success, and defying which is destruction."

THE APPLICATION OF PERUVIAN GUANO TO THE SOIL.—An amateur farmer sowed a large heap of finely pulverized Peruvian Guano on his well-prepared tobacco field last spring. A light warm shower followed the sowing. The next day, when he went to set out the plants, he was astounded at the strong scent of the carbonate of ammonia now going off to the atmosphere. Of course the guanoed portion of the field gave no sign afterward of extra vegetation. Mr. W. said that his head was so full of horses at that time that he entirely forgot the directions to mix the guano with plaster or dry muck, and to harrow it under as fast as it was sown. But he is so much of a practical chemist that he has learned from his blunder to have greater faith in the fertilizing power of guano.

3rd Month.

MARCH, 1864.

31 Days.

FATTENING CATTLE IN WINTER, if one has a good barn cellar, may be done upon pumpkins. We put eight waggon-loads of our best pumpkins into the cellar, and piled up a dozen loads more in a sheltered place, covering them with straw, and they did good service in feeding milch cows and fattening beef in a open winter. Toward the last, our beef was fed on cut hay and barley meal; and many who saw it thought better seldom seen, dead or alive. Many farmers have had more pumpkins wasted than would suffice to fatten two or three head of cattle.

MUCK, APPLIED UNMIXED TO THE SOIL, serves a valuable purpose as a fertilizer, especially on lands deficient in vegetable matter. Let all who can, detail their experience on the subject; it is one which should be urged upon farmers.

PREPARING FIRE-WOOD IN THE FALL is urged because it is a *leisure* time with the farmer. Not often, so far as my experience goes. Get up your wood in the winter, enough to last a year; saw and split in spring, before you can do field work, is my advice in the matter.

STAGGERS IN CATTLE.—Give a teaspoonful of pulverised camphor twice a day. It will cure in every case if attended to in time.

CURING HAY.—A correspondent says, "I usually cut my grass before it is quite ripe. Cut, and get it into the barn the same day. The juciest I put over head, or at the edges. Do not pack down much. Leave a load on the waggon a short time, and scatter some salt upon it. The hay is seldom hurt, but looks green and fresh through the winter."

BOYS IN HORSES.—A friend informs us that he has found feeding the horses once a week on a mess of potatoes an effectual remedy.

SOWING GRASS SEED IN THE FALL, if done early—as soon as the first of September—will succeed first rate. The young grass must have time to get rooted before winter. This we have tried to our satisfaction, and would prefer September seeding in all cases were not other work then so hurrying, and a drouth often to be feared. We shall seed some 15 acres of oats this spring—and in the fall also, if it does not prove successful.

THE BAROMETER is a truly valuable instrument, and every farmer will do well to have one. The "signs of the sky," however, are not to be despised, as read by an experienced eye.

THE PROFITS OF FARMING are often underrated. Because a man cannot show a pile of hard cash at the end of the year it does not follow that he has made nothing at farming. If he had kept an expense account of the items outside his farm business, it would have shown him "where the money goes," little by little, very likely.

FLOW DREPER ! Yes ! don't be afraid of going too low with the plow. Try the experiment at least, if you are not satisfied on the subject.

WINTER CARE OF DAHLIAS.—As soon as the frost has killed the stalks take up the bulbs, leaving them attached to the crown of the plant, as those that break off are worthless. Dry them in the sun a few days, protecting them from wet or frost, and then put them in a cool dry place in the cellar. As extreme cold weather comes on protect them, as you would potatoes, from freezing. No danger of their being destroyed by rats or mice, as neither ever touch them.

SEPTEMBER, 1864.

30 Days.

FARMERS, PLANT APPLE ORCHARDS !—If any farmer, says the *Country Gentleman*, who has had for 20 years a good orchard of grafted apple trees, properly selected for market, and in tolerably favourable portions of the country, has kept an account of the annual *average* product of his trees for that time, he will find they have *netted* him fifty dollars per acre a year. This remark applies to such orchards as have had no care. Those which have received good cultivation have done better. Why then cultivate whole farms, at hard labour, for a net proceed of five dollars per acre ? Why not plant orchards ?

TREATMENT OF HENS.—Two flocks of hens were compared. One laid eggs almost all the time, the other laid scarcely any. On examining their treatment the following differences were found to exist: the former had a warm cellar to roost in during winter; the latter roosted in a stable where the wind blew in. The former had a fine place in an open cellar for scratching among ashes, lime, and earth; the latter scratched in the manure heap, or in the stable where the cows were put out. The former had plenty of good water, with milk, &c., the others had no drink but what they could find.—*Rural American.*

11th Month.

NOVEMBER, 1864.

30 Days.

CARE MORE for books and pictures. Don't keep a solemn parlor, into which you go but once a month with the parson or sewing society. Hang around your walls pictures which shall tell stories of mercy, hope, courage, faith, and charity. Make your living room the largest and most cheerful in the house. Let the place be such that when your boy has gone to distant lands, or even when, perhaps, he clings to a single plank in the lonely waters of the wide ocean, the thought of the still home-stand shall come across the desolation, bringing always light, hope, and love.

MOVE TOWARD A BETTER LIFE. Do not keep your boys corn-shelling in the long winter evenings. Make the farm a place that your sons and daughters cannot help loving. Cultivate the trees—they are God's messengers. Don't say you care nothing for looks. You *do care*, else why did you build that two-story house, with blinds, and a cupola into which you never go. Or why did you, years ago, carefully brush your coat, and pull up your shirt collar, when you were starting on a Sunday evening to visit the good woman who now shares your home.

LETTER RATES.

Letters forwarded via Halifax to England, or from England via Halifax, per Cunard steamer, are charged 6d. sterling per $\frac{1}{2}$ oz., or 12 $\frac{1}{2}$ cents.

REGISTRATION.

The system of registration is applicable to all description of letters without distinction, whether they contain articles of value or not. It also applies to parcels. The charge, in addition to postage, is 10 cents.

PARCELS.

Parcels closed at the ends and sides can be sent by mail, throughout the province, at a rate of 25 cents. per lb. The weight of each parcel is not to exceed 3 lbs., nor the size to exceed 1 foot in length or breadth, or 6 inches thickness. The parcel must not contain any glass, liquid, nor any substance liable to do injury to the mail, under the penalty of a forfeiture of the parcel if discovered. The parcel is not to contain any writing. Registration

fee 5 cents. Parcels must be pre-paid by stamps. The sender, by writing his name on the outside, can have the parcel returned in case of failure to reach the person addressed.

NEWSPAPERS AND PERIODICALS.

Newspapers published in the Province, as well as transient papers, are forwarded through the Provinces, and to England (via Halifax), free of postage. If sent to England by way of the United States, the postage (2 cents.) is collected at their destination.

NEWSPAPERS BY MAIL FROM ENGLAND OR THE UNITED STATES.

If by way of Halifax, per Cunard steamer, free. By way of the United States, 2 cents. each on delivery, being the American transit charge.

BOOKS, PERIODICALS, PUBLICATIONS, PRINTED MATTER, &c.

The above pass through the Post-office at the rate of 1 cent per oz. Printed circulars, in unsealed envelopes, not exceeding $\frac{1}{2}$ oz., are charged 1 cent. each, and must be pre-paid.

POSTAGE STAMPS.

Postage stamps are provided at the respective values of 1 cent; 5 cents. for ordinary Provincial letters; 10 cents for United States rate; $12\frac{1}{2}$ cents., per Cunard steamer, via Halifax; 17 cents., via United States for England.

During the week ending 25th July, 1862, 18,363 letters passed through the Post-office in the city of St. John, N. B., and 49,636 newspapers.

INSPECTORS, viz.—Edmund Hillyer Duval, St. John, for the Eastern District, viz. Counties of King's, Westmorland, and Albert; Daniel Morrison, Carleton St. John, for the Southern District, viz. St. John, Charlotte, and Queen's Counties; Edward C. Freeze, Fredericton, for the Western District, viz. York, Salisbury, Carleton, and Victoria Counties; Thomas W. Wood Richibucto, Kent, for the Northern District, viz. Northumberland, Kent, Gloucester, and Restigouche Counties.

THE The Parish School Terms close 31st March, and 30th September, immediately after which "Returns" should be made to the Education Office.

All papers or communications for the Board of Education, or for the Office of Education, may be addressed

"EDUCATION OFFICE,"
Fredericton.

TRAINING AND MODEL SCHOOLS, ST. JOHN.

Provincial Training and Model Schools, Hazen and Coburg Street, Saint John N. B., William Mills, *Master*; Marianne Duval, *Teacher in Female Department*; John Mills, *Teacher in Model or Practising School*.

The Terms commence January 17, April 11, August 1, October 24. Each candidate for admission, is required to make a written application, to present a certificate of good moral character from a clergyman, and to pass a satisfactory examination in the common branches, viz:—Spelling, Defining, Reading, Arithmetic, Writing, Grammar, and Geography.

All candidates are required to present themselves at the School-room at nine o'clock, A. M., of the first day of the Term; for only in *very special* cases is any one entitled to an examination for admission after that day.

Males are required to be at least 18 years of age, and females at least 16. Candidates are expected to bring their ordinary school books.

All letters should be prepaid to ensure attention.

Examinations for Licenses are held in the last week of each Term.

The Trained Teacher, upon obtaining Licence, and securing an engagement in the Parish school service, is entitled to "Board allowance" while attending Training School at the rate of \$2 per week, not exceeding \$24.

Application for "Board allowance to be made at the Education Office," accompanied by Trustees certificate of bonafide engagement, and entrance upon service.

Plans of school house and furniture, to be had upon application at the Education office.

SIGNALS.

Displayed at Partridge Island, on the approach of Vessels to the Harbor of Saint John.

One ball close, for one square-rigged vessel.

One ball half hoisted for two square-rigged vessels.

Two balls close, for three square-rigged vessels.

Two balls separated, for four square-rigged vessels.

A Pendant of any colour, for five square-rigged vessels.

A Pendant under a Ball, for six square-rigged vessels.

A Pendant over a Ball half-hoisted, for seven square-rigged vessels.

A Pendant under two Balls close, for eight square-rigged vessels.

A Pendant between two Balls separate, for nine square-rigged vessels.

A Flag of any colour, for ten or more square-rigged vessels.

The above are displayed at the East or West yard arm, according to the direction in which the Vessels are at first observed, and as soon as their rig can be distinguished, descriptive Colours will be hoisted at the mast head, in the following order :

A Union Jack, for a Flag Ship, with or without a squadron.

“ “ with a Red Pendant over, for a two-decker.

“ “ with a Blue Pendant over, for a Frigate.

“ “ with a White Pendant over, for a small armed vessel.

A Blue Pendant for a Merchant Ship.

A Red Pendant for a Merchant Brig.

A White and Blue Pendant for a foreign vessel.

A White Pendant, without a ball, for a Topsail Schooner or Sloop.

A Blue Flag pierced white, for a Steamboat from Saint Andrews or Eastport.

A Red Flag pierced white, for a Steamboat from Digby.

A Red Flag with a white square, for a Steamboat from Boston.

A Ball at the mast head, Vessel is on shore or in distress.

RATES OF PILOTAGE.

Established by a Law or Ordinance of the Common Council of the City of Saint John.

One Dollar per foot, for bringing any Ship or Vessel into the Harbor of Saint John, and mooring her into a safe place or berth, or securing her alongside of one of the Wharves; and \$1 per foot for removing and taking any Ship or Vessel out of the Harbor.

In case where Pilots shall be detained on board of Vessels, under and by Virtue of the Quarantine or Health Laws of the Province, they shall be entitled to demand and receive from Masters of such Vessels, the sum of \$2 per day, for every day of such detention, in addition to the allowance aforesaid.

Coasting Vessels, going from one part of the Bay of Fundy to another, British Steam Boats, or British Vessels drawing under six feet of water, are not compelled to take pilots; when employed, they are to be paid according to the rate above mentioned.

For removing Vessels from any mooring ground to any Wharf, or from one Wharf to another Wharf, and seeing them properly moored or secured, the following rates: For Vessels not exceeding One Hundred Tons, \$1 50c.; for Vessels over One Hundred and not exceeding Two Hundred Tons, \$2; for Vessels over Two Hundred and not exceeding Three Hundred Tons, \$3; and for all Vessels over Three Hundred Tons, and not exceeding Four Hundred Tons, \$4; and 25c. for every Fifty Tons such Vessel may measure over Four Hundred Tons.

First Distance.—From Partridge Island to Musquash Cove Head, bearing North West, \$1 per foot.

Second Distance.—From Musquash Head to Point LePreaux, bearing North West, \$1 25c. per foot.

Third Distance.—From Point LePreaux to North Head of Grand Manan, bearing North West—or North Channel, bearing South East, \$1 50c. per foot.

Fourth Distance.—From the North Head of Grand Manan—or North Channel as aforesaid—to Machias Seal Island, bearing South or Brier Island bearing South South East, \$1 75c. per foot.

Fifth District.—Any where outside the aforesaid distance, \$2 per foot.

HARBOUR MASTER'S FEES.

On Vessels of 30 Tons and under 50, 50c.; Vessels of 50 Tons and under 75, 75c.; 75 and under 100 tons, \$1.; 100 and under 150 tons, \$1 25; 150 and under 200 tons, \$1 50; 200 and under 300 tons, \$2; 300 and under 400 tons, \$2 50; 400 and upwards, \$3; Decked Vessels, under 100 tons, owned and registered at Saint John, and all British Vessels under that tonnage trading within the Bay of Fundy, or arriving from Ports to the Northward of Cape Cod, or the Westward of Cape Canso, or from any Port in Nova Scotia, to pay annually as follows; Under 30 tons, 75c.; over 30 and under 50 tons, \$1; over 50 and under 75 tons, \$1 20; over 75 and under 80 tons, \$2.

RATES OF WHARFAGE.

Established by Act 5, Vict. cap. 49, in the City of Saint John and Parish of Portland.

For every Decked Vessel, or Woodboat, of the burthen of 40 tons and under, 30c. per day; above 40 tons, and under 50, 35c.; above 50 and under 60, 40c.; above 60, and under 70, 45c.; above 70, and under 80, 50c.; above 80, and under 90, 55c.; above 90, and under 100, 60c.; above 100, and under 120, 70c.; above 120, and under 150, 80c.; above 150 and under 180, 90c.; above 180, and under 200, \$1; above 200, and under 220, \$1 10; above 220, and under 240, \$1 20; above 240, and under 260, \$1 30; above 260, and under 280, \$1 40; above 280, and under 300, \$1 50; above 300, and under 320, \$1 60; above 320, and under 340, \$1 70; above 340, and under 360, \$1 80; above 360, and under 380, \$1 90; above 380, and under 400, \$2; above 400, and under 450, \$2 25; above 450, and under 500, \$2 50; and 25c. for every additional 50 tons.

RATES OF SLIPPAGE AT THE CORPORATION SLIPS.

All Decked Vessels, same rates as for Wharfage; Woodboats, and all other Boats, or undecked Vessels, having standing Masts, and all Scows, and not lying at the wharves on either side of Slips, to pay the following rates:

Woodboats of sufficient burthen to carry 10 Cords of Wood, or under, 60c.
 ditto ditto upwards of 10 Cords, and not more than 15, \$1.
 ditto ditto upwards of 15 Cords, and not more than 20, \$1 50.
 ditto ditto upwards of 20 Cords, \$2.

The above to be paid each trip, and if any such Vessel remains over six days, an additional duty to be paid of from 50c. to \$1 daily, according to the burthen. Other Boats and Vessels without decks, and having fixed or standing masts, and all Scows, to pay 30c. each trip and 30c. additional per day, if suffered to remain over three days.

RATES OF FERRIAGE ACROSS THE HARBOUR OF SAINT JOHN.

Foot passengers, 4c.; Children under twelve years, 2c.; Horse 5c.; Ox, or other large animals, 5c.; Elephant or Camel, 25c.; single Waggon not loaded, 4c.; single waggon, with horse and one man, 10c.; single waggon, with horse, load and man, 12c.; double waggon, not loaded, 12c.; double waggon, with horses and man, 15c.; double waggon, with horses, load and man, 25c.; barrel, 2c.; bag containing two bushels, 2c.; firkin, keg, or box of the same size, 2c.; cask of lime, 4c.; pipe, hogthead, or puncheon, whether in waggon, cart, sled, or other vehicle or not, except containing molasses, vinegar, rice, or sugar, 15c.; every cwt. of iron, steel, or copper, whether in waggon, cart, or other vehicle or not, 2c.—Carts, sleds, drays, and carriages, same as waggons.

RATES OF TOLLS FOR CROSSING THE SAINT JOHN SUSPENSION BRIDGE.

For every foot passenger, (excepting children under five years of age), 4c.; horse, mare, gelding, mule, ass, ox, cow, or other large animal, 7c. each; elephant or camels, 50c.; carriages, sleigh, waggon, cart, sled or other vehicle, drawn by one horse or beast of draught with one person, with or without load, 13c.; horse or beast of draught, more than one, with a carriage or other vehicle, 7c. each; sheep, calf, hog, or goat, 1c.

RATES AT THE PUBLIC WEIGHING MACHINES.

Every load not exceeding One Thousand Pounds Weight, One Shilling; and One Penny for every additional Hundred Weight; payable, half by the seller, and half by the purchaser,

HACKNEY COACH FARES.

For conveying one passenger from any public stand to any part of the City, or from any one part of the City to any other part thereof, 20c.; and for every passenger exceeding one, 10c. additional; and if any driver, of any Carriage or other vehicle, shall be detained at any place by any passenger, or shall make any agreement for carrying any passenger by the hours, he shall be entitled to ask, and receive the following rates, viz:—For any time not exceeding half an hour, 25c.; and in that proportion for every half hour. If such Carriage, or other vehicle shall be detained or employed. Provided always, that in case any driver shall be required to cross the Ferry to Carleton, he shall, in addition to the foregoing fares, be entitled to demand and receive the ferriage for himself, his carriage and horses, both going and returning.

PUBLIC PORTERS AND HAND CART MEN.

For loading, carrying, and housing any goods, or any other article on any Hand Cart, from the Market Slip in King's and Queen's Wards, or from any other place within the limits of the first district, to any other place within the said several Five districts, the rates of prices are as follow: For the first district, 5c.; second district, 6c.; third district, 7c.; fourth district, 8c.; fifth district, 9c.

MARKET TOLLS.

Beef, per quarter, 4c.; Calf, Sheep, Hog, Goat, Lamb, Kid, or Sheat 4c.; Tub, Pail or Jar of Butter, 3c.; Firkin, 5c.; every 10 lbs. of Roll Butter, 2c.; Cheese, 1c.; load of Potatoes under 15 bushels, 5c.; ditto over 15 bushels, 10c.; load of Oysters in shell or tub, 10c.; Turkey, Goose, or dozen of Pigeons, 1c.; pair Ducks, Fowls, or Partridge, 1c.; bag of Flour, Meal, Oats, Peas, or Beans, 1c.; Ham or Shoulder, 1c.; Eggs, per 10 doz., 1c.; and all other articles in like proportion.

FISH MARKET DUES.

For every Salmon, 3c.: Codfish, Pollock, Bass, or Shad, each 1c.; Hallibut, not exceeding 20 lbs. 2c.; exceeding 20 lbs. and for every 20 lbs. 2c.; every Lobster, 1c.; dozen of Haddock, 3c.; every 100 of Gaspereaux, Alewives, Herrings, or other small fish, 3c.

TIME FOR GOING THROUGH THE FALLS—(near Saint John).—The Falls are level or still water at or about three and a half hours on the *flood*, and about two and a half on the *ebb*, so that they are passable four times in twenty-four hours, about ten or fifteen minutes each time. No other rule can be given, as much depends on the floods in the River Saint John, and the time of high water or full sea, which is often hastened by high winds, and in proportion to the height of them.

RATES OF CARTAGE IN SAINT JOHN.

The Militia List is corrected to the end of September, 1863, but as many errors must still exist on account of the length of time that has elapsed since the last publication, it is particularly requested that Officers noticing omissions or mistakes will communicate with the Officers commanding Battalions, who will forward the corrections to Head Quarters.

Secretary and Treasurer—Frederick E. Barker, Esq., M. A., B. C. L.

This society was organised on the 14th of May 1863, among the graduates of the University for the purpose of promoting its interests, cultivating a friendly feeling among the Alumni, and establishing a prize for competition among the undergraduates. Its affairs are managed by a Council consisting of the Officers of the society—the President and Vice Presidents, who are members *ex-officio*—and seven other members. There are two regular meetings of the society during the year, one, the *Encœnia* meeting, is held at the University on the evening preceeding the day of the *Encœnia*; the other is held at Saint John, on the second Thursday in January. The Alumni prize for the present year, is a gold medal, which will be presented to the Author of the best latin translation of the fifteenth letter of Junius, at the *Encœnia* of 1864.

SAINT JOHN PROTESTANT ORPHAN ASYLUM.

LOCATED IN CARMARTHEN STREET, CORNER OF ST. JAMES STREET.

EUROPEAN AND NORTH AMERICAN RAILWAY.

COMMISSIONERS.—Robert Jardine, *Chairman*, George Thomas, and Richard C. Scovil.

General Supt.—Lewis Carvell; **Resident Engineer**—J. Edward Boyd; **Accountant**—Robert Marshall.

This line of railway connects the city of St. John, on the Bay of Fundy, with Shediac, on the Gulf of St. Lawrence. It is 108 miles in length, and is considered the best and most perfectly constructed railway in America. In the Summer season two trains pass daily each way between the termini.

From Moncton, 93 miles from St. John, travellers are conveyed daily, by four-horse coaches, 100 miles to Truro, and thence, 64 miles, by railway to Halifax, Nova Scotia.

During the Summer, steamers running from Shediac, in connection with the railway, convey passengers and freight to the Northern portion of New Brunswick, to Canada, and to Prince Edward's Island.

The passenger fare is 2 cents. per mile for first class, and about two-thirds of this amount for second class.

STEAM COMMUNICATION FROM ST. JOHN, NEW BRUNSWICK.

TO PORTLAND AND BOSTON—By steamers on every Monday and Thursday morning.

TO WINDSOR AND HALIFAX—By steamer every Tuesday and Friday evening, connecting with steamers to and from Portland and Boston, forming a through line of travel, by steamers and railway, from Halifax to all points in the Canadas and the United States.

TO FREDERICTON—Every morning at nine o'clock, and alternate evenings at six o'clock; connecting with steamers to Woodstock, and by stage and railway, via Houlton and Bangor, forming an inland line of travel to all points in the United States and Canada.

TO NEW YORK, BOSTON, PORTLAND, ST. JOHN, AND CALAIS—Through route from Arcostook, Presque Isle, Houlton and Woodstock, via the New Brunswick and Canada Railway, and International Steamship Company. Trains leave the Houlton and Woodstock terminals for St. Andrews, to connect with steamer for Portland, Boston, St. John, and Calais.

FERRY BOATS.

The Ferry is leased from the Corporation, for the space of ten years, from July 10th, 1860, by John McSweeney.

Dennis Coughlan, *Superintendent*.

One boat runs at a time, and returns at night to the Eastern Side.

Runs from the Ferry Landing, foot of Princess Street, on the east side, to Rodney Slip, Carleton, except at low water, spring tides, when the passengers are landed at Sand Point.

With the names of the Patentees, and of the Inventions with the dates of the Patents.

NAMES.	INVENTIONS.	DATE OF PATENT.
Austin, Cornelius	Planing and framing machine	26 August 1837
Ayers, Fred. J.	Nail machine feeding apparatus	11 June 1851
Adams, Austin	Pug mill	11 August 1855
Allan, T., (2 pat.)	Imprv. in ships' capstans & windlasses	May & June 1857
Armstrong, J. M.	Washing machine	6 October 1859
Allen, David L.	Steering gear	26 June 1860
Brown, Wm.	New mode of treating coal, &c.	1 July 1853
Blanchard, T.	New mode of bending wood	4 March 1854
Bessemer, H., (2)	New mode of manufacturing iron	May & Nov. 1857
Brown, Thomas	Improvmt. in capstans and windlasses	8 June 1854
Brown, James	Shingle machine	10 July 1855
Beard, William	New material for coating water pipes	26 Novem. 1858
Betteley, Joseph	New mode manufacturing ships' knees	28 Novem. 1861
Clark, Joseph C.	Improved water wheel	5 April 1835
Cleveland, W. S.	Brick machine	6 April 1836
Cairns, William	Revolving brick press	29 March 1853
Clayton, Henry	Manufacture of bricks	14 July 1854
Craig, George	Sawing wood in bevelled form	9 July 1855
Clenkard, Hy. R.	Improvement in 2nd anchor shackle	22 May 1857
Cato, Miller, & Co.	Improvement in ships' knees	7 Septem. 1857
Colton, Reub. P.	Carleton air-tight cook stoves	22 July 1859
Coleman, James	Rheumatic and horse liniment	9 October 1859
Cushing, Andre	Hooks for gang saws	11 May 1860
Cole, Andrew H.	Plumb and level	5 Novem. 1860
Cushing, Andre	Saw table	22 March 1861
Deering, William	Hay and cotton press	19 May 1856
Davis, David L.	Elastic railway bearings	22 July 1857
Davis, Frankford	Planing saw	23 Febr. 1860
Dickie, David M.	Rotary harrow	17 May 1861
Furbish, Webber	Horse power	8 March 1839
Fraser, J. W.	Hydrophoric machine	6 July 1835
Fowles, Robert	Apparatus for decomposing coal, &c.	16 August 1852
Farmer, Moses G.	Electric telegraph	9 Decem. 1856
Flewelling and Fairweather }	Horse hay rake	3 April 1861
Geaner, Abraham	Mastic pavement	4 Novem. 1851
Ditto	Kerosene, &c., from coal	4 March 1854
Gilbert, Sam. H.	Mowing machine	6 March 1854
Gilmour, George	2nd anchor shackle	22 May 1857
Ditto	Messenger shackle and block	25 May 1857
Guilford, Hy. P.	Horse hay rake	20 April 1859
Gray, And. G.	Supporting and working ships' yards	20 July 1859
Ditto	Spiral and lever gear for ships' pumps	25 Novem. 1861
Hawley, George	Shingle machine	10 Novem. 1851

NAME.	INVENTION.	DATE OF PATENT.
Hall, Washington	Stump extractor	29 June 1858
Hunt, Edward	New mode of treating resins	13 October 1859
Hamilton, T. L.	Design : ornament for stove	6 Decem. 1860
Hainsworth, W.	Improvement in ships' windlasses	Aug. '61, Feb. '62
Hyslop, John H.	Washing machine	5 Febr. 1862
Holt, James	Circular saw gang	6 April 1863
Kennedy, J. A.	Improved hydrant	4 October 1858
Knowlton, David	Improved capstan	19 April 1861
Lahe, Zenas	Thrashing machine	21 June 1841
Lake, James	Bran duster	21 Febr. 1851
Lamb, Thomas	Snow plough	25 Febr. 1863
McLellan, R. N. B.	Ready guide f. planing timber to be sawn	1 Aug. 1853
Matthews, Geo.	Improved printing ink	10 June 1857
Mace, John A.	New mode of taking ambrotypes	14 Sept. 1857
M'Callum, D. C.	New mode of bridge building	21 May 1860
McAleer, Michael	Improvement in steam boilers	20 May 1863
Nagy, Daniel	New form of cap	26 Febr. 1855
Pitt, Richard	Improved rudder	15 Febr. 1856
Pochin, H. Davis	New mode of treating resins, &c.	13 October 1859
Price, John	Design for shirt bosom	8 August 1861

PATENT LAWS OF NEW BRUNSWICK.

The following digest of the different Statutes relating to Letters Patent granted in this Province has been compiled for this work by Peter Stubs, Esquire, Patent Agent and Barrister at Law. The card of Mr. S. will be found on another page.

LETTERS PATENT.

1. The Lieutenant Governor is authorised to grant Letters Patent to any applicant for a term not exceeding fourteen years, giving to him and his representative the exclusive right to make, use and vend any new invention or discovery. By act of assembly, 25 Vic. cap. 33, it is provided, "that the fees to be paid by a foreigner on Letters Patent, shall be the same in all cases and no more than those now charged to British subjects, provided that the Government of the country of which such foreigner is an inhabitant shall not discriminate against the inhabitants of this Province." This statute was passed to reciprocate with a similar enactment of the United States, approved March 2, 1861. Formerly all foreigners were charged in this Province far higher fees on Patents than were charged to British subjects; now, all applicants, no matter of what nationality, under the above condition, are placed upon an equal footing. In Canada, an applicant for a Patent is required to be a British subject, and a resident of that Province at the time of his application, and in Nova Scotia such applicant must be a British subject, and have been a resident there twelve months prior to the date of his petition.

2. The applicant must state in his petition the nature of his invention, and that it has not been known or used by others prior to his discovery, and is not then in public or common use in this Province. The allegation of the petitioner must be verified on oath to the best of the applicant's belief. Any person taking a false oath, or making a false affirmation in reference to patent matter is subject to suffer such punishment as persons convicted of wilful or corrupt perjury are liable to. By act 19 Vic. cap. 21 (1856) the same persons who are authorised to take the acknowledgments or proofs of

the execution of deeds [see 1st vol. Rev. Statutes, p.p. 286, 287] are authorised to administer the oaths required from applicants for patents, residing here or in foreign countries.

3. The petition with an accurate description of the invention is to be filed in the Secretary's office. A model, when the case admits of it, must also be lodged.

4. If any person entitled to a patent here dies before the same is granted, his executor can apply for it, for the benefit of the estate; the oath in such case is varied to suit the circumstances.

5. Patents may issue in the name of any assignee of an inventor, for any discovery made in this Province.

6. Foreign patents may issue to any assignee in New Brunswick, upon a proper assignment thereof.

7. Where an inventor has obtained a patent in any other country for his invention, and a patent is granted in this Province for the same discovery, the last patent shall expire with the first one.

8. Where any person shall improve upon an invention, he obtains no right to the original invention, neither has the original inventor any right to the improvement.

9. All patents are originally in whole or in part. Assignments must be recorded in the Secretary's office, within three months from date of execution thereof.

10. If patentee without fraud claim for any material part, which he has not invented, his patent is still valid for so much as is really his own, if it is distinguishable from the part patented without right. In such case a disclaimer must be filed in the Secretary's office, and will form part of the original specification.

11. If a patentee makes an improvement, he can have a description of the same annexed to his original specification. The Provincial Secretary then certifies the time of annexing, when it has the same effect as an original patent.

12. Patents may issue for a term not exceeding seven years for any original design of art or ornament, or of a manufacture, or of the printing any material.

13. Patents granted in England subsequent to 3rd May, 1853, and extending to the colonies, are of no force here until copies of original specifications and drawings are filed, and duplicates of models are lodged in Secretary's office. (This provision is virtually inoperative, as the Commissioner of Patents in England has for some time past refused to extend the grants to those colonies having legislatures.) [See Johnson's Patentee's Manual, London, 1853, p. 72.] Such Commissioner has the power to extend English Patents to the Colonies, under the authority of an Imperial enactment, 15 and 16 Victoria, c. 63, Sec 18. We are not aware, however, that this power has ever been exercised so far as New Brunswick is concerned.

14. Copies of all documents filed in the Secretary's office, certified under

his hand, shall be evidence in all courts, and any person may obtain a copy of any such document, on payment of fees.

16 "If any person shall in any way infringe on the right of any patentee, he shall forfeit three times the actual damage occasioned by such offence, to be recovered with costs in the Supreme Court."

17. The law provides for the disposal of an application for a Patent, where it apparently interferes with another application then pending. The proceedings in such cases are complicated, dilatory, and expensive, and it is not likely they will ever be resorted to. See 1 Rev. Statutes p.p. 300, 301.

CAVEAT.

18. "Any person making a discovery or invention, and desiring further time to mature the same, may file in the Secretary's office a CAVEAT, setting forth its purpose, its principle, and distinguished characteristics, praying that his rights may be protected, the CAVEAT shall be filed in the Secretary's office, preserved in secrecy, and be in force one year. If application be made within the year by any person for a Patent, which apparently will interfere with the rights of the party filing the CAVEAT, the Secretary shall deposit the description, specification, and drawings of the applicant in his office, preserving secrecy, and give notice of the application by mail or otherwise, to the person filing the CAVEAT, who within three months after receiving such notice, shall file his description, specifications, and drawings, or the CAVEAT shall be void."

19. All patents shall be void, if the patentee shall not within three years after the granting thereof, establish in this Province the manufacture of, or introduce the article, improvement, or composition of matter for which the same was granted. By 23 Vic. cap 41, upon good cause shown, the Lieut. Governor is empowered to grant a further time, not to exceed three years, to the patentee, wherein to introduce his invention, from the expiration of the first three years. This enactment applies to all future Letters Patent.

20. Any person affixing to any article the name, or a fraudulent similarity of the name of any patentee of such article without his consent, or the words "patent," "patentee," or "Letters patent," or words of similar import, on any unpatented article, for the purpose of deceiving the public, is liable to a penalty of \$100, one half to be paid to the Provincial treasurer, the other, to the prosecutor.

21. Patentees must stamp or affix on each patented article offered for sale, or on the package containing it, the date of the Patent, under a penalty of \$20, for each offence.

22. Where a defendant in an action relies on a previous invention, he must give notice thereof with his plea, and must state the names and residences of his witnesses. If judgment pass for the defendant in such case, the patent becomes void. Whenever a plaintiff fails in his action on the ground that his specification or claim embraces more than that to which he is entitled as first inventor, and it shall appear that the defendant had used any part of the invention truly specified and claimed as specified and claimed as new, the Court may make such order as to costs as shall be equitable.

23. No action can be sustained for any offence recognized by the Patent law, unless the same is commenced within six months after the knowledge of the offence committed.

FEEES ON PATENTS.

If a British subject, a foreigner entitled under sec. 1 (above) pay-			
able to government		£21	50
If a foreigner, not thus entitled		40	00
Filing a caveat		20	00
A subsequent improvement		16	00
On re-issued patent on surrender of old patent		16	00
Application for a design		12	00
Copies of papers on file, for over 100 words		00	40
Recording assignments, or other papers not exceeding 300 words		00	40
Every additional 100 words		00	20
Copies of drawings and models per agreement		—	—
Attorney General or other Law officer, on every patent issued, from		9	35
to £14, according to circumstances.			

The following charges are made for patents in the different countries named below by their respective governments:—

UNITED KINGDOM.

sterling.

On receiving petition		£ 5	0 0
On motion of intention to proceed		5	0 0
On sealing Letters patent		5	0 0
At or before expiration of third year		40	0 0
At or before expiration of seventh year		80	0 0

OTHER DUTIES.

On warrant of law officer for Letters patent		5	0 0
On certificate of payment of fee at end of third year		10	0 0
On certificate of payment of fee at end of seventh year		20	0 0

Patents are invariably granted in the United Kingdom for 14 years.

FRANCE.

Patents are granted for 15 years on payment in advance of £4 sterling annually. The cost of a patent including first year's tax and agency charges is £12 12 0 sterling.

UNITED STATES.

Patents are granted for 17 years. No renewal. Government fees \$25. The inhabitants of New Brunswick are the only British North American colonists who can take out patents in the United States, upon the same terms as American citizens.

BELGIUM.

Patents are granted for 20 years at an annual tax commencing at 10 francs and increasing 10 francs annually.

HOLLAND.

The government tax varies from £14 to £60.

AUSTRIA.

Patents are granted for any number of years not exceeding 16. Whole cost £10 10 0.

In pr
harrow
60 ox-c

BAVARIA.

Patents are granted for 15 years. Cost £21 0 0.

SARDINIA.

The cost of a patent for one year with right to extend to 15 is £24 0 0.

RUSSIA.

The cost for a patent for 8 years and agency is £95 0 0.

CANADA.

None but a resident British subject can take out a patent in Canada.
Term 14 years. Government fee \$20.

NOVA SCOTIA.

The applicant for a patent must be a British subject, and have resided 12 months in the Province. Government fee \$4. Term 14 years.

MISCELLANEOUS.

TOBACCO CULTURE.

Mr. John C. Roberts, of Farmington (Conn.) gives the following directions for the successful culture of tobacco. The article is copied from the *Albany Cultivator*, and may be found useful in many districts of this Province.

Preparation of the Seed Bed.

We have generally prepared the seed bed in the fall by heavy manuring plowing in deep, and leaving the bed in a rough state till the following spring. As soon as the frost is out of the ground spade the bed over, for the purpose of bringing the manure to the surface and thoroughly mixing with the soil, at the same time clearing out all roots of weeds and grass.

After levelling the bed we make the soil as compact as possible, either by rolling with a heavy roller or tramping with the feet. We then rake the surface lightly with a fine tooth garden rake, and sow the seed, raking lightly to cover it, and then roll or tramp it again.

The seed is so very small, being smaller than mustard seed, that it is better to mix it with dry muck or ashes before sowing, as it is more evenly distributed on the bed. We sow about as thickly as in sowing cabbage seed in the garden. The bed is treated precisely as a bed in the garden, in weeding, &c.

When the plants have three or four leaves, which should be about the middle of May, on a rainy day we sow on about two quarts of fine guano per square rod, being particular to sow on the guano while it rains, for if the sun comes out soon after it is sown, there is danger of burning the leaves.

Preparation of the Ground.

In preparing the ground for setting out the plants, we think it best to harrow in the manure, which should be fine compost. We use from 40 to 60 ox-cart loads per acre—(the ox-cart load is about 35 bushels.)

g. 15. Whole

The land being manured and well harrowed, we set the teeth of our marker $3\frac{1}{2}$ feet apart, and mark it out one way. We then raise a ridge about 6 inches high by turning two furrows together with a horse plow. The ridges being made, we mark across them, making the marks $2\frac{1}{2}$ feet apart.

We have generally used some special manure in the hills for the purpose of giving the plant a start. We have tried Peruvian guano, about 300 to 600 pounds per acre; castor pomace, from 300 to 3000 per acre, and the Lodi Company's poudrette 2 to 4 barrels per acre.

The guano and castor pomace it is necessary to sow on the marks, or in a furrow made for the purpose, before making the ridges (thus being directly over the guano or pomace), as so large a quantity placed in the hills would destroy the plant.

We like the poudrette best, as we can place that in the hills without injury to the plant. We also think the poudrette gives the best tobacco.

We make the hills at each intersection of the marks, with a hoe, spitting them lightly, thus making the hills $3\frac{1}{2}$ by $2\frac{1}{2}$ feet.

We set the plants from the 5th to the 15th of June, (choosing if possible a rainy or damp day for the purpose,) though I have seen very handsome crops raised set as late as July 4th.

Insects injurious to the Crop.

Some years we have been greatly troubled by cut worms, for which reason we have been in the habit of plowing in a green crop, either rye or clover, which feeds the worms, and consequently they do not eat the tobacco so badly.

The cut worm usually finishes its work of destruction by July 4th, up to which time, when a rainy day comes, all hands turn out and set over the plants missing.

The green, or tobacco worm proper, commences operating about July 1st. We often find the eggs (of the miller, which produces the worm,) on the under side of the leaf: they are about the size of a large pin's head, and a light pea green colour. The miller flies by night and is rarely seen. I have never seen but two in the seven years we have raised tobacco. The head looks very much like an owl's; the body is grey in colour, about $1\frac{1}{2}$ inches long, and the wings when spread extend about 3 inches from tip to tip. The green worm is a constant source of annoyance from its first appearance until the tobacco is cut. We sometimes have to go over the ground every day for worms, though in some seasons once a week will suffice.

Cultivation, Harvesting, &c.

The tobacco will not grow much until it is hoed, as the ground becomes hard, and must be well stirred to give the root a chance to start. There is an advantage in setting the plants on a ridge, for they are not so apt to be covered with dirt by the horse hoe, or by a heavy shower. We generally hoe as often as we can, but rarely more than 3 times, unless the ground is very weedy, which should not be the case in good farming.

The cost of production varies greatly with the seasons, as when we have a dry season we have to water the plants and cover them with a little cut

hay to prevent the sun from scorching them. The past season was very favourable, there having been so much damp weather about sowing time that we did not cut or water a plant on $4\frac{1}{2}$ acres.

After the tobacco is set the labour is about double what it is on corn. I have never made an exact calculation of the expense of raising tobacco, but for myself I can say I would rather take care of an acre of tobacco than two acres of corn. The land which will produce 2000 pounds of tobacco per acre will not produce over 70 bushels of shelled corn, which shows a large difference in favor of tobacco.

About the middle of August the tobacco is in blossom. We then go over the field and break off the tops, taking off about 4 or 6 leaves with the top, according to the size of the plant.

In about a week a sucker starts at the junction of each leaf with the stalk. These must be taken off before cutting as, if left on, it is very inconvenient to handle the tobacco.

We generally commence cutting about the tenth of September, for by that time most of it is ripe, and if it stands after it is fully ripe it will often rust. The rust is in spots on the leaf and injures the quality.

We commence cutting in the morning after the dew is off, and let it lay for a while to wilt, being careful not to let it long enough to get sunburnt. After being wilted enough to handle without breaking the leaves, it is placed in a cart or waggon and drawn to the curing house, which is generally a shed or rough building, which may be shut up close or opened to let in air. The best buildings are about 34 or 36 feet wide, and as long as convenience may dictate—36 feet allowing of three 12 feet rails across the building. We hang from 26 to 35 plants on a rail according to size.

The butt of the stalk is placed against the rail, and the twine passed around it, the twine being crossed on top of the rail between every two plants, as they are placed on alternate sides. The rails are about 20 inches apart, allowing room for a good circulation of air, which is absolutely necessary, as without it the tobacco will sweat on the poles, and is lost.

In about six weeks or two months the tobacco is sufficiently cured to strip. After it is well cured the first damp day we open every door and window to let in the air, for it is necessary to have it damp to keep it from breaking.

When it is taken from the poles it is placed in a pile, a double tier, the tips lapping about 6 inches or 1 foot, butts evenly laid and closely packed to prevent drying.

If not damp it may lay so for several days without injury, but it requires close watching to prevent it from heating. We divide it after stripping, into three kinds, called wrappers, seconds, and fillers. The wrappers are the choicest leaves, the seconds have many imperfect leaves, and bring about half the price of wrappers, the fillers are the poorest leaves, and bring about one-third the price of wrappers. When the leaves are stripped from the stalk about a dozen leaves are put together and a leaf coiled around the butts, which makes a hand. As a general thing the more particular we are in assorting the better price we get. I have seen a really nice lot of tobacco sold for a small price for want of care in assorting.

I think we have averaged 15 cents a pound for wrappers, 7½ cents for

seconds, and 5 cents for fillers during the seven years we have raised tobacco, and the weight would average 1500 pounds per acre, though we have raised 3200 pounds on one acre and sold it for 20 cents per pound for the first quality.

In such a yield as the above there would not be over 300 pounds of the first and second qualities both together.

After stripping it is evenly packed in piles, (keeping the various qualities separate, of course,) butts out and tips lapping a very little, three or four inches perhaps. We do not case it but sell to dealers who do. The case is made of merchantable soft pine boards, and is about $3\frac{1}{2}$ feet long by $2\frac{1}{2}$ wide and $2\frac{1}{2}$ deep. About 400 pounds of tobacco is put in each case by means of a screw. In a few days after casing the sweating process commences. During some stages of this process a person not acquainted with it were he to examine the tobacco would say it was worthless, being perfectly soft and apparently rotten. I have often seen the outside of the case so hot as to draw the pitch from knots in the boards.

The tobacco must go through this process before it is manufactured, to give it the necessary finish.

GLEANNINGS FROM OLD NEWSPAPERS.

Royal Gazette, October 18, 1786.—Some time since was launched at Grimross, on the river St. John, a ship of 300 tons burthen called the *New Brunswick*; and on Saturday last was launched on the same river, distant about 40 miles from this city, a brigantine of about 150 tons burthen. We are assured by a gentleman of veracity, that the goodness of their timbers (being all white oak) and the workmanship on them, cannot be exceeded in any of the new States of America.

Royal Gazette, June 3, 1786.—The Corporation having purchased two fire engines for the use of the city, and have directed one to be keep'd at the Market place, Upper Cove, the other at the Market place, Lower Cove.

Those who incline to join the two Engine Companies will leave their names with Mr. Munson Jarvis, and Mr. John Colvill, Merchants.

Royal Gazette, June 20, 1786.—On Saturday last 22 sail of vessels were riding at anchor in the harbor of this city.

Royal Gazette, August 1, 1786.—Last Sunday morning preached in the Church of this city, the Rev. Mr. Bisset, lately arrived from England, and in the evening, Messrs. Moor and Gibbons, of the people commonly called Quakers, the former from New Jersey, and the latter from Pennsylvania, to which places they mean to return after they have finished their religious visits in this country. The whole gave great satisfaction to crowded audiences.

Royal Gazette, August 8, 1786.—Yesterday his Excellency Governor Carleton embarked on board the *Brisk*, sloop of war, and sailed for Westmoreland; report says his excellency means to return by land.

Royal Gazette, August 22, 1786.—Arrived on Sunday last his Excellency Governor Carleton, after an absence of thirteen days from this city, during which time he has visited the County of Westmoreland, and walked across

the country from thence to Pleasant valley along the intended road. His Excellency was two nights in the woods but met with fewer obstacles to his rout than he expected. We are told, that he was much pleased with the Country through which he passed, and that he was particularly gratified in the content and industry, that so generally prevails in that part of the Province.

We hear that from an actual experiment made, at the Salt Springs at Pleasant Valley, in the parish of Springfield, (Sussex 1), it appears that from two pounds of the water (troy weight) there was obtained one ounce 5 drams and 12 grains of good salt, and that there is great reason to expect that a decided advantage may be derived to this Province from these springs.

Royal Gazette, Oct. 24, 1786.—Those gentlemen, who wish and intend to encourage the Rev. Mr. James Fraser, to settle in this city, are requested to meet at the Coffee house tomorrow evening precisely at 7 o'clock. It is expected every person thus inclined will not fail to attend, that it may be known with certainty what salary can be promised to Mr. Fraser.

Royal Gazette, Nov. 7, 1786.—In consequence of the appointment of the Right Honorable Lord Dorchester, to be Governor and Commander in Chief of British America, the late Governors have received from England new Commissions appointing them Lieutenant Governors, etc. And we hear from Fredericton that the Commission appointing our worthy Governor, Lieutenant Governor, under his noble brother, was read on the 30th of October, and that immediately afterwards he took the usual oaths.

Royal Gazette, Dec. 12, 1786.—Charity Sermon.—On Christmas day a Charity Sermon will be preached by the Rev. Mr. Bisset, after which there will be a collection made for the poor.

Royal Gazette, January 9th, 1787.—Now in the press and will be published on Saturday next, the pleasure and advantage of Brotherly Unity, a Sermon, preached before the Right Worshipful Master, Wardens, and Brethren of the 54th Regimental Lodge of free and accepted Masons, in the Parish Church of Saint John, on December 26, 1786, by George Bisset, A.M., Rector of St. John, and Missionary from the Society for the propagation of the Gospel in foreign parts.

Royal Gazette, June 5th, 1787.—Church of Scotland. Whereas the Rev. James Fraser, has returned to this city, a meeting of the Members of that Church, and encouragers of the Gospel, is requested at the Coffee House, on Wednesday Evening the 6th instant at 6 o'clock, on business of importance.

Royal Gazette, Dec. 18th, 1787.—At a Court of General Quarter Sessions of the Peace held at the City Hall of this City on the fourth instant Silas Slutt was indicted for a felony, convicted, and sentenced to receive thirty-nine stripes, which were afterwards well laid on.

Royal Gazette, Aug. 26th, 1787.—On Wednesday last, after administering confirmation to a great number of persons, and delivering an excellent charge to the clergy, the Right Rev. the Bishop of Nova Scotia, with the customary ceremonies, laid the corner stone of the new Trinity Church.

Royal Gazette, Dec. 1st, 1795.—St. Andrew's day.—Yesterday being the anniversary of St. Andrew, the same was celebrated at Mrs. Mallard's by a number of respectable characters. The Company met at 4 o'clock; and after partaking of an elegant collation a variety of Toasts were given, suitable to the occasion. No festival could be more agreeably celebrated: all the Company endeavoured to vie with each other in the display of sociability and good humour; and it is but justice to all present to say that everything was conducted with the greatest harmony and propriety.

Royal Gazette, Aug. 19, 1796.—The English Mails for the months of May and June, arrived at Halifax on the 8th instant, in six weeks from Falmouth; those for this Province and Canada were received at the Post office in this city on Saturday last (the 13th). The London papers received by the mails are to the 18th June, inclusive.

Royal Gazette, Feb. 18th, 1800.—Last week the Hilary Term of the Supreme Court was held at Fredericton, at which we understand there was few causes agitated of any consequence excepting one upon an Habeas Corpus brought by a negro woman claimed as a slave by Captain Jones of Fredericton, in order to procure her liberation. The question of slavery upon general principles was discussed at great length, by the Counsel on both sides, and we understand the Court were divided in their opinions, the Chief Justice (Ludlow) and Judge Upham being of opinion that by the existing law of this Province, Negroes may be held as slaves here, and Judge Allen and Judge Saunders being of opinion that the law upon that subject is the same here as in England and therefore that slavery is not recognized by the Laws of this Province. The Court being thus divided, no judgment was entered.

Royal Gazette October 23rd 1809—FOR SALE, A NEGRO WENCH, named NANCY, belonging to the Subscriber—a good title will be given.

October 19, 1809.

D Brown

Royal Gazette Oct. 23rd 1809. SUNDAY SCHOOLS.—As the profanation of the Sabbath has of late years become truly alarming so as to threaten the utter subversion of Religion and subordination, in order if possible to stop so growing an evil, SUNDAY SCHOOLS have been established in many places, particularly in England, the happy effects of which have exceeded the utmost expectations. A similar institution is now begun in this City, but as a considerable expense in Books, Fuel, &c., will be necessary to support it (though the Teachers gratuitously attend them)—the well known liberality of the Public is therefore appealed to, and subscriptions will be received by Thomas Horsefield, Esq. and Mr. John Ferguson.

Royal Gazette Feb. 12, 1810.—Friday (9th) arrived the Speedy packet from St. Andrews—She brings papers from the Westward to the 27th ult. We have extracted from them London dates to 25th Nov. and accounts from Washington to the 10th ult. containing the late War Message of President Madison, which will be found in the preceding columns of this day's *Gazette*.

Royal Gazette, Feb. 26, 1810—**POSTSCRIPT**—We were, last evening, favored with a London paper of November 27th; a Liverpool paper of the 22nd and two or three Cork papers to the 15th of December: received overland from Yarmouth U. S. to which place they were brought by the Brig Lasher, from Liverpool Eng.

Royal Gazette, March 5th, 1810—On Sunday the 28th ult, a sermon was preached by the Rev. Mr. Pidgeon at Fredericton, (concerning Sunday Schools for poor children) from Prov. 22-6.

After the Sermon, a collection was made for Poor Children, amounting to £18. 4s. 3d.

Royal Gazette, Aug. 3rd 1812—From the *London Morning Post* of June 9, 1812—"We have received a copy of an Act passed at the last Session of the General Assembly of the Province of New Brunswick, granting to his Majesty the sum of £10,000 as an aid in defence of the Province, in case of hostilities with the United States of America—a strong proof of the loyalty and spirit of His Majesty's subjects in that infant colony, when it is considered that the revenues of the Province do not much exceed £6000 per annum."

Royal Gazette, Nov. 23rd 1812.—Sailed yesterday H. M. schooner Bream, and Government sloop Bruuswick, in quest of two privateers said to be off Point Le Preau. Upwards of 20 seamen belonging to the different ships in the harbour, volunteered their services on board the Brunswicker, as did also several citizens.

ORIGIN OF THE PENNY POST.—The penny-post was devised in 1683, by one Mr. David Murray, an upholder in Paternoster Row. It soon became an object of attention to Government; but so low were its profits that one Dackwra, who succeeded Murray, had a pension of only £200 a year given him in lieu of it. This occurred in 1716.

CHARITY REWARDED BY A RICH AND LIBERAL MENDICANT.—Within the present century, a beggar in Moorfields used daily to have a penny given him by a merchant on his way to the Exchange. The penny was withheld, and the appearance of the merchant manifested his embarrassment and distress. The beggar at length spoke to him, offered him a loan of £500, and another of the same sum if it were required. It re-established his affairs.

FIRST IRON CANNON.—The first cannon was cast in Sussex in 1535. In after years bonds were taken in £1,000 from the owners of the charcoal furnaces, that none should be sold till a license for the sale or issue of the ordnance had been procured. Fears were entertained that the enemy would purchase them.

ORIGIN OF THE WORD LADY.—It was the custom at the time of the Plantagenets, and previously, for ladies of distinction and wealth regularly to distribute money or food to the poor. The title of *lady*, is derived from the Anglo-Saxon, and literally signifies *giver of bread*. The purse, with similar meaning, was named as a receptacle for *alms*, and not as an invention for the preservation of money.

STRONG ATTACHMENT TO SMOKING.—The following is a curious case of extreme fondness for smoking in a very poor and very old man. In the year 1810, there died in Dartford workhouse, aged 106, one John Gibson. He had been an inmate of the house for ten years, and till within two months of death used daily to perambulate the town. His faculties were entire to the last. He was so much attached to smoking, that he requested his pipe, together with his walking-stick, might be placed in his coffin, which request was complied with.

ASYLUM FOR DESTITUTE CATS.—Of all the curious charitable institutions in the world, the most curious probably is the Cat Asylum at Aleppo, which is attached to one of the mosques there, and was founded by a misanthropic old Turk, who being possessed of large granaries, was much annoyed by rats and mice, to rid himself of which he employed a legion of cats, who so effectually rendered him service, that in return he left them a sum in the Turkish funds, with strict injunctions that all destitute and sickly cats should be provided for, till such time as they took themselves off again. In 1845, when a famine was ravaging in all North Syria—when scores of poor people were dropping down in the streets from sheer exhaustion and want, and dying there by dozens per diem before the eyes of their well-to-do fellow creatures, men might daily be encountered carrying away sack loads of cats to be fed up and feasted on the proceeds of the last will and testament of that vagabond old Turk, whilst fellow creatures were permitted to perish.

SELF-NOURISHMENT.—That animals may sometimes be kept alive for a long time solely on nourishment supplied from their own bodies, is evident from the fact that after a great fall of earth on one occasion from the cliff at Dover, which buried a whole family, a hog was found alive five months and nine days after it had thus been buried! It weighed about seven score when the accident happened, and had wasted to about thirty pounds, but was likely to do well.

RINGING THE CHANGES.—It is curious to note the number of changes which may be rung on different peals. The changes on seven bells are 5,040; on twelve 479,001,600, which it would take ninety-one years to ring at the rate of two strokes in a second. The changes on fourteen bells could not be rung through at the same rate in less than 16,575 years; and upon four-and-twenty, they would require more than 117,000 billions of years.

EXTRAORDINARY FROST.—As an instance of great rarity in England of the severity of a frost, it is worth notice, that in January, 1808, the rain froze as it fell, and in London the umbrellas were so stiffened that they could not be closed. Birds had their feathers frozen so that they could not fly, and many were picked up as they lay helpless on the ground.

CHARACTER INDICATED BY THE EARS.—According to Aristotle, large ears are indicative of imbecility; while small ones announce madness. Ears which are flat, point out the rustic and brutal man. Those of the fairest promise, are firm and of middling size. Happy the man who boasts of square ears; a sure indication of sublimity of soul and purity of life. Such, according to Suetonius, were the ears of the Emperor Augustus.

FRENCH ASSIGNATS.—THEIR ORIGIN.—In the year 1789, at the commencement of the great Revolution in France, Talleyrand proposed in the National Assembly a confiscation of all church property to the service of the state. The Abbe Maury opposed this project with great vehemence, but being supported by Mirabeau, it received the sanction of the Assembly by an immense majority on the 2nd of November. The salaries fixed for the priesthood were small, and moreover were not sufficiently guaranteed; whence originated much misery to all classes of priests, from the archbishops down to the humble cures; and as monastic institutions were treated in the same way, monks and nuns were suddenly placed in precarious circumstances regarding the means of subsistence. Here, however, an unexpected difficulty sprang up; the National Assembly were willing to sell church property, but buyers were wanting; conscience, prudence, and poverty combined to lessen the number of those willing to purchase; and thus the urgent claims of the treasury could not be satisfied. Applications for loans were not responded to; taxes had been extinguished; voluntary donations had dwindled almost to nothing; and 400,000,000 of livres were necessary for the vast claims of the year 1790. The municipalities of Paris and other cities sought to ameliorate the state of affairs by subscribing for a certain amount of church property, endeavouring to find private purchasers for it, and paying the receipts into the national exchequer. This, however, being but a very partial cure for the enormity of the evils, the National Assembly fell upon the expedient of creating state paper or bank notes, to have a forced currency throughout the kingdom. Such was the birth of the memorable assignats. Four hundred millions of this paper were put in circulation; and a decree was passed that church property to that amount should be held answerable for the assignats.

IGNORANCE AND FEAR.—In the year 1712, Whiston predicted that the comet would appear on Wednesday, 14th October, at 5 minutes past 5 in the morning, and that the world would be destroyed by fire on the Friday following. His reputation was high, and the comet appeared. A number of persons got into boats and barges on the Thames, thinking the water the safest place. South Sea and India Stock fell. A captain of a Dutch ship threw all his powder into the river, that the ship might not be endangered. At noon, after the comet had appeared, it is said that more than one hundred clergymen were ferried over to Lambeth, to request that proper prayers might be prepared, there being none in the church service. People believed that the day of judgment was at hand, and acted upon this belief, more as if some temporary evil was to be expected. There was a prodigious run on the bank, and Sir Gilbert Heathcote, at that time the head director, issued orders to all the fire offices in London, requiring them to keep a good look out, and have a particular eye on the Bank of England.

FOOD OF ANIMALS.—Linnaeus states the cow to eat 276 plants, and to refuse 218; the goat eats 449, and declines 126; the sheep takes 387, and rejects 141; the horse likes 352, and avoids 212; but the hog, more nice in its provision than any of the former, eats but 72 plants, and rejects 171.

POSITION IN SLEEPING.—It is better to go to sleep on the right side, for then the stomach is very much in the position of a bottle turned upside down, and the contents of it are aided in passing out by gravitation. If one goes to sleep on the left side; the operation of emptying the stomach of its contents is more like drawing water from a well. After going to sleep, let the body take its own position. If you sleep on your back, especially soon after a hearty meal, the weight of the digestive organs, and that of the food, resting on the great vein of the body, near the back bone: compresses it, and arrests the flow of the blood, more or less. If the arrest is partial the sleep is disturbed, and there are unpleasant dreams. If the meal has been recent and hearty, the arrest is more decided: and the various sensations such as falling over a precipice, or the pursuit of a wild beast, or other impending danger, and the desperate effort to get rid of it arouses us and sends on the stagnating blood; and we wake in a fright, or trembling, or perspiration, or feeling of exhaustion, according to the degree of stagnation, and the length and strength of the efforts made to escape the danger. But when we are not able to escape the danger, when we do fall over the precipice, when the tumbling building crushes us, what then? *That is death!* That is the death of those of whom it is said, when found lifeless in the morning—"That they were as well as they ever were the day before;" and often it is added, "and ate heartier than common!" This last, as a frequent cause of death to those who have gone to bed to wake no more, we give merely as a private opinion. The possibility of its truth is enough to deter any rational man from a late and hearty meal. This we do know, with certainty, that waking up in the night with painful diarrhoea, of cholera, or bilious cholic, ending in death in a very short time, is properly traceable to a large meal. The truly wise will take the safe-side. For persons who eat three times a day, it is amply sufficient to make the last meal of cold bread and butter and a cup of some warm drink. No one can starve on it, while a perseverance in the habit soon begets a vigorous appetite for breakfast, so promising of a day of comfort.

PROPER USE OF EXERCISE.—Those who are able can scarcely take too much exercise of any kind, so that it is kept within the bounds of fatigue. Walking, riding, rowing, fencing, and various games, as fives, tennis, cricket, &c., are all to be recommended to those who are able to enjoy them. Horse exercise is particularly beneficial when it can be borne, partly from the exhilarating effect of rapid motion on the spirits, but principally by the complete circulation of the blood it leads to; by the gentle exercise of voluntary inspiration it induces.

Reading aloud and singing, when not carried to excess, are most beneficial exercise, and can be practised by the most infirm. They tend to produce deep inspiration, equal expansion of the lungs, and give free excess of air to the smaller divisions of the air passages, thereby decarbonizing the blood more rapidly. The lungs, diaphragm, and walls of the chest are gently but freely exercised, and the air tubes are free from obstruction. Like all other organs, those of respiration acquire power by exercise, and that which at first produces breathlessness is soon performed almost unconsciously, and without fatigue. In all these cases, and in all gymnastic exercises, care must be taken not to hurry the circulation so as to produce either breathlessness or muscular fatigue.

SIR ISAAC NEWTON'S TASTE FOR FARMING.—When Newton had reached his fifteenth year, he was called from the school at Grantham, to take charge of his mother's farm. He was thus frequently sent to Grantham market, says Timbs, to dispose of grain and other agricultural produce, which however, he generally left to an old farm servant who accompanied him, and Newton made his way to the garret of the house in which he had lived, to amuse himself with a parcel of old books left there; and afterwards he would entrench himself on the wayside between Woolsthorpe and Grantham, devouring some favorite author till the companion's return from market. And when his mother sent him into the fields to watch the sheep and cattle, he would perch himself under a tree, with a book in his hand, or shape models with his knife, or watch the movement of an undershot water-wheel. One of the earliest scientific experiments which Newton made was in 1658, on the day of the great storm, when Cromwell died, and when he himself had just entered his sixteenth year. Newton's mother was now convinced that her son was not destined to be a farmer; and this, with his uncle finding him under a hedge, occupied in the solution of a mathematical problem, led to his being again sent to Grantham, and then to Trinity College, Cambridge, which thence became the real birth-place of Newton's genius.

CURE AND PREVENTION OF THE POTATO ROT.—Mr. H. Penoyer, of Union county, Illinois, published, in the *St. Louis Republic*, his experience and success in preventing the potato rot. He had tested his preventive for four years with perfect success, while others in the same field who neglected it, lost their entire crop. It is asserted, also, that the root is nearly double the size. The remedy is as follows:—"Take one peck of fine salt, and mix it thoroughly with half a bushel of Nova Scotia plaster or gypsum, (the plaster is the best;) and immediately after hoeing the potatoes the second time, or just as the young potatoes begin to set, sprinkle on the main vines, next to the ground, a tablespoonful of the above mixture to each hill, and be sure to get it on the main vines, as it is found that the rot proceeds from the sting of an insect in the vine; and the mixture, coming in contact with the vine, kills the effect of it before it reaches the potato."

SOAP SODA FOR GARDENING PURPOSES.—A correspondent of the *Collage Garden* says he once used with complete success soap and water freely administered to a row of celery which was in a fair way of being devoured by maggots, and he has no doubt that it would be equally successful with onions. At every house where there is a garden, he recommends that the soap-suds should be saved for this and similar purposes, such as to destroy slugs, &c., about the roots of sea-kale, &c. A solution of soft soap applied with a painter's brush to apple trees, is a cheap and speedy way of getting quit of the American bug. He has also completely cleared in the same way his morella cherry trees of the filthy insect with which they are invariably infested. It is far more effectual than syringing, it being so difficult to hit the whole of the under side of the leaf with the syringe or garden engine, whereas the paint brush reaches every part, and a woman or boy will soon do a number of trees.

HOUSE-HOLD RECEIPTS.

Method of Cleaning Paper-hangings.—Out into eight half quarters a large loaf, two days old; it must neither be newer nor staler. With one of these pieces, after having blown off all the dust from the paper to be cleaned, by means of a good pair of bellows, begin at the top of the room, holding the crust in the hand, and wiping lightly downward with the crumb, about half a yard at each stroke, till the upper part of the hangings is completely cleaned all around. Then go round again, with the sweeping stroke downwards, always commencing each successive course a little higher than the upper stroke had extended, till the bottom be finished. This operation, if carefully performed, will frequently make very old paper look almost equal to new.

To Clean Paint.—Never use a cloth, but take off the dust with a little long-haired brush, after blowing off the loose parts with the bellows. With care, paint will look well for a long time, if guarded from the influence of the sun. When soiled, dip a sponge or a bit of flannel into soda and water, wash it off quickly, and dry immediately, or the soda will eat off the color. Some persons use strong soap and water, instead.

When the wainscot requires scouring, it should be done from the top downwards, and the water be prevented from running on the unclean parts as much as possible, or marks will be made which will appear after the whole is finished. One person should dry with old linen, as fast as the other has scoured off the dirt, and washed off the soap.

To give to Boards a beautiful appearance.—After washing them very nicely with soda and warm water and a brush, wash them with a very large sponge and clean water. Both times observe to leave no spot untouched; and clean straight up and down, not crossing from board to board; then dry with clean cloths, rubbed hard up and down in the same way.

The floors should not be often wetted, but very thoroughly when done; and once a week dry-rubbed with hot sand and a heavy brush the right way of the boards.

The sides of stairs or passages on which are carpets or floor-cloths, should be washed with sponge instead of linen or flannel, and the edges will not be soiled. Different sponges should be kept for the above two uses; and those and the brushes should be well washed when done with, and kept in dry places.

Composition that will effectually prevent Iron, Steel, &c., from rusting.—This method consists in mixing, with fat oil varnish, four-fifths of well rectified spirits of turpentine. The varnish is to be applied by means of a sponge; and articles varnished in this manner will retain their metallic brilliancy, and never contract any spots of rust. It may be applied to copper, and to the preservation of philosophical instruments; which, by being brought into contact with water, are liable to lose their splendor, and become tarnished.

An easy way to clean Plate.—A flannel and soap, and soft water, with proper rubbing, will clean plate nicely. It should be wiped dry with a good-sized piece of soft leather.

Making Beds.—Close or press bedsteads are ill adapted for young persons or invalids; when their use is unavoidable, the bed-cloths should be displaced every morning, and left for a short time before they are shut up.

The windows of bed-rooms should be kept open for some hours every day, to carry off the affluvia from the bed-cloths; the bed should also be shaken up, and the clothes spread about, in which state the longer they remain, the better.

The bed being made, the clothes should not be tucked in at the sides or foot, as that prevents any further purification taking place, by the cool air passing through them.

A warming-pan should be chosen without holes in the lid. About a yard of moderately-sized iron chain, made red hot and put into the pan, is a simple and excellent substitute for coals.

To Detect Dampness in Beds.—Let the bed be well warmed, and immediately after the warming-pan is taken out, introduce between the sheets, in an inverted position, a clean glass goblet; after it has remained in that situation a few minutes, examine it; if found dry and not tarnished with steam, the bed is perfectly safe; and *vice versa*. In the latter case, it will be best to sleep between the blankets.

Beech-tree Leaves.—The leaves of the beech-tree, collected at autumn, in dry weather, form an admirable article for filling beds for the poor. The smell is grateful and wholesome; they do not harbor vermin, are very elastic, and may be replenished annually without cost.

To clean Looking-glasses.—Keep for this purpose a piece of sponge, a cloth, and a silk handkerchief, all entirely free from dirt, as the least grit will scratch the fine surface of the glass. First, sponge it with a little spirit of wine, or gin and water, so as to clean off all spots; then, dust over it powder-blue, tied in muslin, rub it lightly and quickly off with the cloth, and finish by rubbing it with the silk handkerchief. Be careful not to rub the edges of the frames.

To remove Ink-spots from Mahogany.—Drop on the spots a very small quantity of spirits of salt; rub it with a feather or piece of flannel, taking care not to let the spirit reach the fingers or clothes; in four or five minutes, wash it off with water.

Or, mix a teaspoonful of burnt alum, powdered, with a quarter of an ounce of oxalic acid, in half a pint of cold water; to be used by wetting a rag with it, and rubbing it on the ink spots.

Or, crumple a piece of blotting-paper, so as to make it firm, wet it, and with it rub the ink-spot firmly and briskly, when it will disappear; and the white mark from the operation may be immediately removed by rubbing it with a cloth.

Or, Dilute $\frac{1}{2}$ a teaspoonful of oil of vitrol with a large spoonful of water, and touch the part with a feather; watch it, for if it stays too long, it will leave a white mark. It is, therefore, better to rub it quickly, and repeat if not quite removed.

POST OFFICE MONEY ORDERS.

On and after the 1st November, 1863, the following Post Offices are authorized to issue and pay Money Orders (under directions of the Postmaster General,) for any sum not exceeding in any one Order \$100: namely:

Andover,	Edmundston,	Sackville,
Baie Verte,	Fredericton,	Salisbury,
Bathurst,	Gagetown,	Shediac,
Bend of Peticodiac,	Grand Falls,	Sheffield,
Buctouche,	Harvey,	Saint Andrews,
Campbelltown,	Hillsborough,	Saint George,
Canterbury,	Newcastle,	Saint John,
Caraquet,	Oromocto,	Saint Stephen,
Chatham,	Ossakeag,	Sussex Vale,
Dalhousie,	Richibucto,	Woodstock.
Dorchester,		

When Money Orders exceeding \$100 in aggregate amount, are issued in one day and to the same person, by one or more Offices upon another Office, the Postmaster of the Office drawn upon (if necessary,) may delay the pay of such Orders for six days.

All Money Orders shall be drawn upon Printed Forms supplied by the Post Office Department; and no Order will be valid or payable unless given upon the regular Printed Forms.

The Commission to be charged for Money Orders shall be as follows:—
On orders not exceeding \$10 five cents. Exceeding \$10 and not exceeding \$20, ten cents. Exceeding \$20 and not exceeding \$30 fifteen cents. Exceeding \$30, and not exceeding \$40 twenty cents. Exceeding \$40, and not exceeding \$50 twenty-five cents. Exceeding \$50 and not exceeding \$60 thirty cents. Exceeding \$60, and not exceeding \$70 thirty-five cents. Exceeding \$70, and not exceeding \$80 forty cents. Exceeding \$80, and not exceeding \$90 forty-five cents. Exceeding \$90, and not exceeding \$100 fifty cents.

THE MOUNT ALLISON ACADEMY AND COLLEGE, SACKVILLE, NEW BRUNSWICK.

Parents having Sons to be educated, and Young Men, who are wisely intending to seek for themselves the benefit of a good education, are requested to notice that a thorough course of study, both Academic and Collegiate, either partial or complete, may be prosecuted *under most advantageous circumstances* at Mount Allison.

Sackville, being a quiet country village, pleasant and remarkably healthy, easy of access and yet sufficiently removed from most of the occasions of distraction, temptation, and danger for the young, which so abound in cities and larger towns, is a most suitable place for educational institutions.

The Academy and College Buildings are, in extent and adaptation to the purposes for which they have been erected, incomparably superior to any other in the Eastern Provinces of British America.

The general plan, and all the regulations, domestic and disciplinary, as well as scholastic, in both institutions, are those which have been ascertained, by sufficient trial, to be best calculated to promote the comfort and facilitate the improvement of Students.

Adequate provision is made for thoroughly teaching all the branches of Science and Literature which are included in the curricula of the best conducted educational institutions in Great Britain and America. The United Faculty of the Associated Institutions, Academy (male branch,) and College, includes eleven competent instructors, viz. :—six Professors, one Tutor, two Teachers, and two Assistant Teachers, each duly qualified for the work of instruction in his respective department.

Students completing the prescribed College curriculum and passing the required examinations, will receive the usual University Degrees.

Students belonging to the Academy have the privilege of attending any of the College Classes and Lectures for which they are prepared.

☞ *The Academic Year consists of three Terms of 14 Weeks each : the first of which begins the last Thursday of July; the second, the first Thursday of November; and the third, the second Thursday of February.*

☞ *The expenses for Board, Washing, Fuel, Lights, &c., and Tuition (in all branches except Music) in the Academy are from \$110 to \$130; and in the College, from \$130 to \$150 per Annum.*

For further information send for a copy of the "Mount Allison Gazette."

PETER STUBS,

PATENT SOLICITOR & BARRISTER AT LAW.

Office, No. 13, (Wiggins' Buildings,) Prince William Street,
ST. JOHN, NEW BRUNSWICK.

Through experienced Agents in London and New York, Patents are obtained by him in England and the United States.

When Patents are solicited in England no charge is made for his own services to the New Brunswick applicant, they being compensated by the London agent out of his fees.

Having several works relating to the Patent Laws of England, France, the United States, and British North American Colonies, Mr. S. is prepared to give any information required in connection with the Patent Laws of these countries.

B. S. COHEN'S

Prize Artists' and Account Book Pencils,

As Manufactured in the International Exhibition 1862.

MAKER TO THE QUEEN

By Special Appointment to H. M. Government Offices, Indian Council, &c.

Sanctioned and Approved by the Department of Science & Art, South Kensington.

AND ROYAL FAMILY,

The general complaint that a really good Pencil, equal to the original Cumberland Lead of thirty years ago, cannot be obtained, has become universal.

This fact has induced Mr. B. S. COHEN to devote his attention to the consolidation of the powder and fragments of PURE Cumberland Lead (hitherto laid aside as almost useless), and he has at length succeeded in producing a Pencil which combines all the valuable qualities of the original Plumbago.

The Lead of each Pencil is formed of a *continuous* slip, and is therefore equal throughout in brilliancy of tone and depth of color.

J. & A. McMILLAN, Agents,

FELLOWS & Co.,

CHEMISTS,

FOSTER'S CORNER,

ST. JOHN, N. B.,

Would respectfully inform the Public that they have resumed the

BUSINESS OF CHEMISTS & DRUGGISTS

at the old stand, Foster's Corner, King Street, and respectfully solicit their patronage.

The stock has been selected by Mr. James Fellows, in the markets of London, Glasgow, Paris, and other places, so that every precaution has been used to obtain goods of the very best quality, and having been bought from first hands, peculiar advantages may be expected by purchasers.

Being deeply impressed with the responsibility attached to preparing Prescriptions, only the purest Drugs and Pharmaceutical preparations of the London, Edinburgh, and Dublin Colleges of Physicians will be used for that purpose.

Prices will be found as low as is consistent with the employment of Genuine Medicines.

Wholesale customers supplied on the most equitable terms.

WILL FURNISH SURGICAL AND OTHER INSTRUMENTS AT

MANUFACTURER'S PRICES.

**FELLOWS and Co., Chemists, Foster's Corner,
St. John, N. B.**

NOT ALCOHOLIC!

A HIGHLY CONCENTRATED VEGETABLE EXTRACT.

A PURE TONIC, THAT WILL RELIEVE THE AFFLICTED, AND

Not make Drunkards.

DR. HOOFLAND'S GERMAN BITTERS, Prepared by Dr. C. Jackson, Philadelphia, Pa., will effectually and most certainly cure all Diseases arising from a Disordered Liver, Stomach, or Kidneys.

Thousands of our citizens are suffering from Dyspepsia and Liver Diseases, and to whom the following questions apply—we guarantee HOOFLAND'S German Bitters will cure them.

DYSPEPSIA AND LIVER DISEASES.

Do you rise with a coated tongue mornings, with bad taste in the mouth and poor appetite for breakfast? Do you feel when you first get up so weak and languid you can scarcely get about? Do you have a dizziness in the head at times, and often a dullness, with headache occasionally? Are your bowels costive and irregular, and appetite changeable? Do you throw up wind from the stomach, and do you swell up often? Do you feel a fullness after eating, and a sinking when the stomach is empty? Do you have heartburn occasionally? Do you feel low spirited, and look on the dark side of things? Are you not unusually nervous at times? Do you not become restless, and often stay until midnight before you can go to sleep? and then at times, don't you feel dull and sleepy most of the time? Is your skin dry and scaly? also sallow? In short, is not your life a burden, then, full of forebodings?

HOOFLAND'S GERMAN BITTERS

WILL CURE EVERY CASE OF

CHRONIC OR NERVOUS DEBILITY, DISEASE OF THE KIDNEYS, AND DISEASES ARISING FROM A DISORDERED STOMACH.

HOOFLAND'S GERMAN BITTERS

Will give you a good Appetite, will give you Strong Healthy Nerves, will give you Brisk and Energetic Feelings, will enable you to Sleep Well, and will positively prevent Yellow Fever, Billious Fever, &c.

Those suffering from **BROKEN DOWN AND DELICATE CONSTITUTIONS**, from whatever cause, either in Male or Female, will find in **HOOFLAND'S GERMAN BITTERS**, a Remedy that will restore them to their usual health. Such has been the case in thousands of instances, and a fair trial is but required to prove the assertion.

FELLOWS & Co., Chemists, Foster's Corner,
St. John, N. B.

HOOFLAND'S GERMAN BITTERS.

DISEASES OF KIDNEYS AND BLADDER,
In Young or Aged, Male or Female,
Are speedily removed, and the patient restored to health.

DELICATE CHILDREN,

Those suffering from MARASMUS, wasting away, with scarcely any flesh on their bones, are cured in a very short time; one bottle in such cases, will have a most surprising effect.

PARENTS

Having suffering children as above, and wishing to raise them, will never regret the day they commenced with these Bitters.

LITERARY MEN, STUDENTS,

And those working hard with their brains, should always keep a bottle of HOOFLAND'S BITTERS near them, as they will find much benefit from its use, to both mind and body, invigorating and not depressing.

IT IS NOT A LIQUOR STIMULANT,

And leaves no prostration.

BEWARE OF COUNTERFEITS!

SEE THAT THE SIGNATURE OF "C. M. JACKSON" IS ON THE
WRAPPER OF EACH BOTTLE.

PRICE PER BOTTLE 75 CENTS,
OR HALF DOZ. FOR \$4 00.

Should your nearest druggist not have the article, do not be put off by any of the intoxicating preparations that may be offered in its place, but send to us, and we will forward, securely packed, by express.

Principal Office and Manufactory,
No. 631 ARCH ST.
JONES & EVANS,

Successor to C. M. JACKSON & CO.,
Proprietors.

For SALE by Druggists and Dealers in every town in the United States.

FELLOWS & Co., Agents.
